Certificate Regarding Air Transportation by Passengers with Walking Disabilities

We hereby certify that **Medilife LUNA (D130GL)** including two Lithium-ion batteries (**124.8 Wh, 5.2 Ah each**) of type **UN3481**, P.I. 967 Section II (which meets the requirements of UN Manual of Tests and Criteria, Part III subsection 38.3), may be carried on passenger aircraft without restriction according to **IATA 2.3.2.4. limit of 160 Wh per battery** for powered mobility aids.

BATTERY DESCRIPTION

Battery Name	Model	Nominal Voltage	Nominal Energy
Lithium ion rechargeable battery	24V 5.2Ah Lithium Battery (x2)	24 V	124.8 Wh (each)

Nominal Capacity: **5.2 Ah (each)**

The conditions necessary to meet the above listed regulation are:

- the battery units must be disconnected from the drive unit or the drive unit must be turned off with the power switch.
- the battery units and/or drive unit must be carried in the passenger cabin and stored in a manner to prevent powering on and damage by the movement of baggage, mail or other cargo.
- the pilot-in-command must be informed of the location of the lithium battery units in the cabin.

It is strongly recommended that you make advanced arrangements with each airline operator and receive approval prior to departure date.

This certificate does not apply to damaged or defective batteries.
